### PROFESSIONAL OBJECTIVE

Results-oriented Full Stack Web Developer skilled in modern JavaScript frameworks and RESTful API architecture. Currently specializing in building scalable enterprise applications using Angular and Hapi.js. Experienced in maintaining ERP systems and delivering high-quality code in collaborative, Agile environments.

### WORK EXPERIENCE

**Junior Software Developer Intern**  
**Spectrum Engineering Consortium PVT. Ltd**  
*November 2025 – January 2026*

- Engineering full-stack modules using Angular for dynamic front-ends and Hapi.js for back-end services.
- Optimizing performance through modular code and efficient database queries.

**Front-End Developer**  
**Softvance Agency**

*May 2025 – September 2025*

- Designed and optimized responsive user interfaces to enhance performance.
- Translated complex requirements into functional, user-centric web solutions.

### TECHNICAL PROJECTS

- **Inventory System**  
**Angular, Node.js, Express.js, JWT, PostgreSQL**  
Engineered a secure full-stack role-based access application featuring JWT authentication and real-time stock monitoring.
- **3D Dress Customizer**  
**React.js, Three.js, Node.js, MongoDB**  
Developed a full-stack application enabling real-time 3D personalization of apparel.
- **MovieHub**  
**React.js, TMDB API, JavaScript**  
Built a high-performance movie discovery platform featuring real-time search and responsive design.

### ADDITIONAL INFORMATION

- Specialized in solving complex technical challenges.
- Active contributor to open-source projects.
