

MD. ANIK SHAHRIER

FULL STACK WEB DEVELOPER

Mirpur-1, Dhaka-1216 | 01949958103 | mdanikshahrier@gmail.com | LinkedIn: Anik Shahrier | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with hands-on experience designing and shipping scalable enterprise applications using Angular, React.js, Node.js, and Hapi.js. Skilled at architecting secure RESTful APIs, optimizing database performance, and delivering role-based systems within Agile teams. Combines strong engineering fundamentals with practical experience in technical content development and presentation design, translating complex requirements into clear, high-impact deliverables for both technical and non-technical audiences.

CORE SKILLS

Languages: HTML5, CSS3, JavaScript

Frameworks & Libraries: React.js, Node.js, Express.js, Angular, Hapi.js, Three.js

Databases: MySQL, MongoDB, PostgreSQL

Tools & APIs: RESTful APIs, Render, Git, Vercel, Postman, DBeaver, JWT Authentication, AI Coding Agents

Additional: Technical Content Development, Presentation Design & Delivery, IoT & Computer Vision (Python, OpenCV)

WORK EXPERIENCE

Content Developer & PPT Presentation Expert | *Lecture Publications Limited* May 2026 – Present

- Develop clear, well-structured educational and technical content for print and digital publications, ensuring accuracy and consistency across materials.
- Design and produce polished, audience-ready PowerPoint presentations, translating dense subject matter into visually engaging, easy-to-follow slide decks.
- Collaborate with editorial and subject-matter teams to refine content structure, messaging, and visual flow ahead of publication deadlines.

Junior Software Developer Intern | *Spectrum Engineering Consortium Pvt. Ltd.* Nov 2025 – Jan 2026

- Engineered full-stack modules for an enterprise ERP system using Angular for dynamic, data-driven frontends and Hapi.js for scalable backend services.
- Improved application performance and maintainability by refactoring code into modular components and optimizing database queries.
- Collaborated within an Agile team to maintain and extend production ERP functionality, ensuring reliable day-to-day operations.

Full Stack Web Developer | *Intimacy Computer Solutions* Oct 2025 – Nov 2025

- Built and maintained full-stack web features across the frontend and backend, contributing quickly within a short, high-intensity engagement.
- Maintained ERP system, worked on building new features or modify existing features.

Front-End Developer | *Softvance Agency* May 2025 – Sep 2025

- Designed and optimized responsive, cross-browser user interfaces that improved usability and load performance.
- Translated complex client requirements into functional, user-centric web solutions delivered on schedule.
- Partnered with designers and backend developers to ensure seamless integration between UI and application logic.

Digital Service Officer | *bKash Limited* May 2020 – Oct 2020

- Assisted customers with digital financial service transactions, resolving queries accurately and efficiently in a high-volume service environment.
- Maintained strong service standards and clear communication, contributing to consistent customer satisfaction during the engagement.

TECHNICAL PROJECTS

Inventory Management System — Angular, Node.js, Express.js, JWT, PostgreSQL

- Engineered a secure, full-stack role-based access application with JWT authentication and real-time stock monitoring.

3D Dress Customizer — React.js, Three.js, Node.js, MongoDB

- Built a full-stack application enabling real-time 3D personalization of apparel with an interactive rendering engine.

MovieHub — React.js, TMDB API, JavaScript

- Developed a high-performance movie discovery platform featuring real-time search and a fully responsive design.

PDF Verification System — Node.js, Express.js, JWT

- Built a full-stack tool for validating document authenticity and integrity, streamlining a previously manual verification workflow.

Password Analyzer — JavaScript, Node.js

- Developed a utility that evaluates password strength in real time and flags common vulnerability patterns to encourage safer credential practices.

RESTful Web API — Node.js, Express.js, MongoDB, JWT

- Designed and built a reusable RESTful Web API with secure authentication, structured endpoints, and clear documentation for third-party integration.

Face Mask Detection System — Python, OpenCV, IoT (Raspberry Pi)

- Built an IoT-based real-time face mask detection system using computer vision, combining a trained detection model with hardware sensors for live monitoring and alerts.

ACHIEVEMENTS

- Secured 4th Place at BUBT IT Fest 2019, recognized for innovative project development among university-wide competitors.
- Solved 100+ algorithmic problems on LeetCode, strengthening core skills in optimization and technical interviews.
- Completed multiple self-directed full-stack projects, translating academic training into deployable, production-style applications.
- Recognized by team leads for reliability and clear communication while working across cross-functional development and content teams.

EDUCATION

B.Sc. in Computer Science & Engineering

2024

Bangladesh University of Business and Technology (BUBT)

HSC (Science)

2017

Government Bangla College

SSC (Science)

2015

Monipur High School

ADDITIONAL INFORMATION

- Specialized in solving complex technical challenges across the full development stack.
- Active contributor to open-source projects.
